Health Department

Household Hazardous Waste Disposal

Household hazardous waste is a leftover, unwanted or unusable toxic, flammable, or chemical product. Examples include oil-based paints, drain cleaners, pool chemicals, pesticides, and motor oil. To protect the environment, the unwanted hazardous materials should not be placed in your curbside waste, but keeping them around can pose danger to your children and pets.

Did you know that the Ottawa County Health Department offers free disposal of these hazardous household materials?

The waste can be brought to one of four Ottawa County Resource Recovery Service Centers. Hours and locations on reverse.

What materials are accepted at the center?

In general, the centers accept: aerosols; automotive batteries, fluids, oils and filters; oil based paints; garden and yard chemicals; cleaners and solvents; 4-8 foot florescent bulbs; paint thinners; pool or spa chemicals; fire extinguishers and 20 pound propane tanks. The centers do not accept appliances, latex paint, tires, TVs or computers. A complete list of accepted materials can be found at www.miOttawa.org/Health or by calling 393-5645.
