0	Vegetated swales
0	Other structural storm water controls (See Notes)
Completed on:	
Facility Map Location:	REGIS-Hudsonville Folder

Notes:	Rush Creek
--------	------------

Instructions: Complete all gray areas on the form. If your facility can be identified as more than one type in the drop down menu, use the optional secondary field, if you need 3 or more types, add them to the notes. Provide the number of each type of stormwater structural control at the facility that discharges stormwater to waters of the state.

Facility Name: City of Hudsonville Department of Public Works

Person Responsible for Facility Oversight: Dutch Besteman

Standard Operating Procedure (SOP) for Facilities with HIGH potential for Pollutant Runoff

This facility was assessed and determined to have a high potential to discharge pollutants to surface waters of the state based on the following factors or conditions present on the site:

- Fleet Maintenance or Storage Yard
- Large amount of urban pollutants stored at the site
- Identification of improperly stored materials
- The potential for polluting activities to be conducted outside
- Proximity to waterbodies
- Poor housekeeping practices
- Discharge of pollutants of concern to impaired waters

Site-specific structural and non-structural controls and good housekeeping practices implemented and maintained onsite are identified in the facility inventory in Appendix 6 of the SWMP. Maintenance procedures and good housekeeping practices are detailed in the BMP manual in Appendix 7 of the SWMP.

Inspection

Conduct routine maintenance and inspections of storm water management and control devices to ensure materials and equipment are clean and orderly and to prevent or reduce pollutant runoff.

Routine Maintenance Schedule: Biweekly

Conduct a comprehensive inspection including all structural storm water controls and a review of non-structural storm water controls to prevent or reduce pollutant runoff.

Comprehensive Site Inspection Schedule: Every 6 months

Significant materials

Identify all significant materials onsite with the potential to pollute stormwater.

Material	Handling & Storage Requirements	Potential to Pollute (High, Medium, Low)
Road Salt	Stored in Salt Barn	M
Diesel and Gasoline	Secondary Containment	M
Trash Dumpsters	Lids kept closed	L

Facility Name: City of Hudsonville Department of Public Works
